ABOUT ME

I decided to pursue a Computer Science degree and learn to code because I have a passion for solving problems. I believe that software can solve many of the world's problems. I am a very hard worker, and I am eager to learn as much as possible to further develop my software engineering skills.

EXPERIENCE

Deli Recipes Web Application
www.delidelirecipes.com

This is a website that displays recipes.
I used an API to get the recipes and display them on my website. I used HTML, CSS, JavaScript, and an API to develop this project.

Weekly Dev Jobs
www.weeklydevjobs.com

This is a website that displays new developer jobs from Y Combinator startups. I used the Hacker News API to get the jobs from.

SEO & WordPress Specialist
Digital Dynasty | Las Vegas, Nevada | January 2020 - June 2020

I did link building and WordPress website SEO setups. I optimized the page structure for clients' websites.

EDUCATION

Latin American Technological University
BSc Computer Science

- Specialized in web development
